

Obstacle Plan

Course

The Cable in Milan is a Rixen system built in 1999, about 810 m long. We have 8 obstacles in the course at the moment. The course starts with a Uprail on the left and taxitable on the right, followed by a wallride on the left.

After the obstacles you still have enough space to do an inverted trick before the first corner, between the first corner and the driving tower (about 50m) there are no obstacles, you are able to do a fast invert on the left or an big one on the right.

About 80m after the drive tower there is an A-frame on the right and a small kicker on the left. Then there are two big kickers, one on either side. Finally there is a rail on the right at the end of the course.
